About our Picture Rail Hanging Systems

It is great to learn that you are considering using our picture hanging systems in your upcoming project. In the past we have done many projects which include schools both private and public, polytechnics, universities, libraries, cultural centres, government buildings, banks, hotels, residential apartments and landed properties.

Our Art Hanging Systems offer a contemporary, stylish alternative to conventional methods of displaying art. We offer all kinds of special solutions for flexible hanging of artwork, paintings and various objects of glass and paper.

Whether it's for your home, work space or public space, we can find a solution to suit your needs and complement your interior while providing a functional and versatile solution.

We offer the most complete range of products and solutions in hanging systems and if you can't find a solution? Please contact us! Either by email or by phone, no job is too big or too small.

All of our products that we stock and supply are manufactured in Australia with a few specialised items coming from Europe, nothing comes or is manufactured in China. All our systems are supplied complete with fixing screws and masonry plugs.

Based in Singapore, we supply both locally and internationally and our services include consultancy and installation.

Please find below further information about the picture rail system and accessories that we supply.

Past Projects

Below are just some of the projects that we have worked on supplied locally throughout the years:

- Citibank; Asia Square, Singapore.
- Ministry of Culture, Community and Youth; Singapore.
- Fullerton Hotel; Singapore.
- Goldman Sachs, Mapletree Anson, Singapore.
- The Art Space @ Suntec, Singapore.
- Hong Leong Holdings, Corporate Offices, Singapore.
- Fullerton Hotel; Singapore.
- Glocal Exhibition Gallery; Temasek Polytechnic, Singapore.
- Lee Kong Chian Natural History Museum, Singapore.
- Art Village Gallery & Studio, Singapore.
- Proof Living Showroom, ION, Singapore
- Leica Camera, Raffles Hotel, MBS and Fullerton Hotel Showroom, Singapore.
- The Tiffin Gallery, Singapore.
- OVAS Gallery Showroom, Singapore.
- Louis Vuitton Moet Hennessy Offices, Singapore.
- Vanilla HOME, Club Street Showroom, Singapore.
- Tanjong Pagar Community Centre, Singapore.
- Suntec Management Offices, Singapore.
- HDB, private flats and landed residences

Past Institutions, Schools and Educational Projects

Please find below a list of schools and educational institutions which we have supplied hanging systems to throughout the years.

- National Library; Central Public Library and Marine Parade Public Library, Singapore.
- Chinese Cultural Centre in Singapore; Singapore.
- Anglo Chinese School Independent; Singapore.
- Ngee Ann Polytechnic; School of Design & Environment, Singapore.
- Stamford American International School; various buildings, Singapore.
- Republic Polytechnic; School of Hospitality Singapore.
- Temasek Polytechnic; Visitor Centre, GCV Art Gallery and School of IIT, Singapore.
- Stamford Primary School, Singapore.
- CHIJ - Our Lady of the Nativity, Singapore.
- Ahmad Ibrahim Primary School, Singapore.
- Nanyang Technological University; Chinese Heritage Centre, Singapore.
- Nanyang Polytechnic, Singapore.
- Singapore Polytechnic, Entrepreneur Room, HR Learning Studio and International Business Building Learning Lab, Singapore.
- Hillside World Academy, Singapore.
- Raffles Institution, Singapore.

Past International Projects

Our picture rail hanging systems are already used in the following museums and institutions around the world:

- Stamford American International School, Hong Kong.
- High Commission of Singapore in Malaysia; Kuala Lumpur, Malaysia.
- Sudakara ArtSpace Bali, Indonesia.
- Kula Tree International, Malaysia
- Leica, Kuala Lumpur, Malaysia.
- Bengal Foundation Gallery of Fine Art, Dhaka, Bangladesh.
- Sudamala Suites and Villas, Bali, Indonesia.

We obviously use the system in our own gallery, home and at art fairs both locally and abroad. We look forward to hearing from you soon.

Locator Wall Mounted System

The Locator hanging system has been specifically designed to be an extremely functional way to hang pictures and other objects that are best displayed with a wall hanging system.

When the Locator System is installed, the fixing screws are hidden from view. The rail snaps onto a horizontal row of nylon bushes which are screwed directly to the wall. This is particularly useful if the rail has to be fixed to a hollow partition because some of the mounting plug can be placed on the vertical stud work. Although the mounting plugs can be fixed anywhere on the horizontal line, they must support the whole length of the rail.

The Locator rail system takes 25 kg per metre, therefore 2 meters would take 50kg, 3 metres 75kg, etc... This system can be mounted on both solid and partition walls.

Our railing systems come in lengths of 2 metres, these can be trimmed down with a hacksaw or extended, with a connector (LC), to suit any desired space.

The wires for the systems come in standard lengths of 1.5 and 2 metres. Nylon wires can support 10 kg each and stainless steel wires can support 15 kg. All wires can take multiple hooks. For school projects and public spaces we recommend stainless steel wires and hooks with security latches.

Should you wish to do your own installation, the system is easy to install and we are more than happy to provide you with an installation video and manual. Alternatively we can organise an art installer for your installation. We are also BizSafe compliant and follow the regulatory recommended guidelines.

We kindly request a minimum of 2 weeks lead for orders for over 50 metres. Although we tend to have a few hundred metres always on hand we do, very often, have clients come in last minute and buy large orders.

I would also like to mention that the hanging system company that I represent has been in business for over 20 years and all of our products come from Australia with a few items from Europe. We are happy to offer a 3 year guarantee on our products.

Locator Wall Mounted System

The Locator rail system is available in white and brushed silver colour and supports 25 kg per metre, therefore 2 meters would take 50kg, 3 metres 75kg, etc... This system can be mounted on both solid and partition walls and is particularly useful if your walls are covered with a decorative feature such as wallpaper, stone or wood.

Our railing systems come in lengths of 2 metres, these can be trimmed down with a hacksaw or extended, with a connector hacksaw or extended, with a connector (LC), to suit any desired space.

U-Rail Ceiling Mounted System

The U-Rail hanging system has been specifically designed to be an extremely functional way to hang pictures from wooden ceilings. The rail can simply be mounted onto the wood with a few screws and is almost invisible.

U-Rail System has fourteen pre-drilled holes for the fixing screws which are included.

The U-Rail System supports 20 kg per metre, therefore 2 meters would take 40 kg, 3 metres 60 kg, etc... This ceiling system must be secured on a load bearing structure.

Our railing systems come in lengths of 2 metres, these can be trimmed down with a hacksaw or extended, to cater to any desired space.

The wires for the systems come in standard lengths of 1.5 and 2 metres. Nylon wires can support 10 kg each and stainless steel wires can support 15 kg. All wires can take multiple hooks. For school projects and public spaces we recommend stainless steel wires and hooks with security latches.

| LS20 | 2.0 M | LN20 | 2.0 M | LSSC20 | 2.0 M | LN20 | 2.0 M |

The U-Rail hanging System has a maximum capacity of 20kg per lineal.

We recommend that you use 2 lines per piece and that you **never overload** the maximum capacity of the lines or the rails.

AVANTI Maxi Wall Mounted System

The AVANTI Maxi hanging system has been specifically designed to be an extremely functional way to hang pictures and other objects that are best displayed with a wall hanging system.

The AVANTI Maxi System is our heavy duty system that can be wall mounted and can also be recessed into walls. The system is available in white and (by special request) in brushed silver colour. Apart from being able to be recessed into walls, this system can be installed on both solid and partition walls, when wall mounted. extended, to suit any desired space.

The AVANTI Maxi System has pre-drilled holes in order to ensure an easy and simple installation process.

The AVANTI Maxi System can supports 40 kg per metre, therefore 2 meters would take 80kg, 3 metres 120kg, etc...

Our railing systems come in lengths of 2 metres, these can be trimmed down with a hacksaw or extended, to cater to any desired area.

The wires for the systems come in standard lengths of 1.5 and 2 metres. Nylon wires can support 10 kg each and stainless steel wires can support 15 kg. All wires can take multiple hooks. For school projects and public spaces we recommend stainless steel wires and hooks with security latches.

Solitaire System

A great solution for flexibility with a minimum of installation needed. Perfect to hang from a ceiling but also useful to hang on a small walls, columns, shop windows and ceilings.

The Solitaire system offers the possibility to hang more then 1 object on the same cord to a total maximum of 20 kg/44lbs per set.

A complete Solitaire system set consists of:

mounting foot, closing cap, steel cable and MS (multi-Use) hook.

Paper Rail System

The Paper rail system is the most compact profile in the field of self clamping paper holders. Thanks to a strip, you can perfectly display cards, posters, drawings and similar objects can be placed in the special edge on top of the rail.

The Paper Rail system is suitable for both thick and thin paper and can even hold light magazines up to 3.5 mm and laminated paper. The rail practically has a one-piece design and can be mounted in different ways.

Multiple rails can be connected to create a hanging system that spans an entire wall. The Paper rail is produced from high quality aluminium in combination with a rubber clamping inside

The rail comes complete with end caps, screws and plugs.

Exhibition Systems

Throughout the years we have both participated and assisted in many exhibitions, fairs and events outside of the context of a four wall gallery.

Due to these past experiences we have a selection of hanging systems which can cater to false exhibition (partial walls).

Please feel free to contact us should you require assistance at your next event.

The PS (Panel System) rail comes complete with a wire in either Nylon or Stainless steel.

PHW - Used on exhibition or trade fairs simply slots over the top edge of a partition wall.

Available with nylon and stainless steel wire and can be used with multiple hooks.

PS/PN - For those with homes that have existing wooden picture rails.

Available in either brass or silver finish with nylon or stainless steel wire.

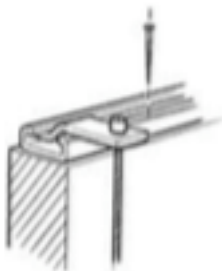

PHW - Used on exhibition or trade fairs simply slots over the top edge of a partition wall.

Available with nylon and stainless steel wire and can be used with multiple hooks.

PS/PN - For those with homes that have existing wooden picture rails.

Available in either brass or silver finish with nylon or stainless steel wire.

Artshow - Used when Avant Maxi is fixed to the top edge of a partition wall.

Available with nylon and stainless steel wire and can be used with multiple hooks.

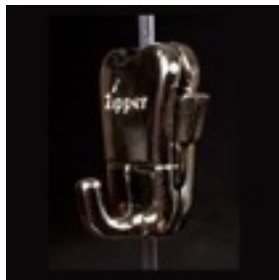

PosterSnap - Ideal for day to day use and constant changing of lightweight advertisements, they can be used for posters, flyers, foam boards and notices.

Hook Selection

Hooks are necessary in order to hang pictures, frames or mirrors onto the wires.

All wires can support multiple hooks as long as the weight is within the weight limitation of each wire.

For school projects and public spaces we recommend hooks with security latches.

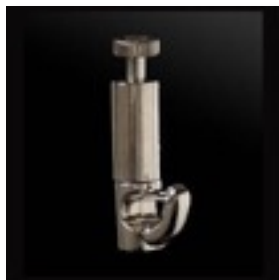

LNZ - Nylon Zipper hook.

This hook is intended for lightweight items and works of art and for use on nylon wires.

MS - Multi-Use hook.

This new design allows easier mobility than previous models. hook is intended for use on both nylon and stainless steel wires.

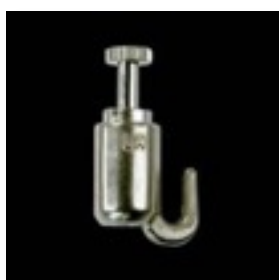

LSSH - Super Security hook.

This sturdy security hook can be used only on stainless steel wires.

MSS - Multi-Use Security hook.

Newly launched, this hook has a security latch and can be used on both nylon and stainless steel wires. This hook is mainly used in schools, galleries and public areas.

HL - Heavy Duty hook.

This hook has a deep groove and can be used on both nylon and stainless steel wires.

Our hooks are both simple and secure, adjusting the height is done by simply holding or pressing on the hook to slide into position. Once it is perfectly placed, just release and it is automatically locked. The hooks can be reused or removed in an instant, it's that simple!

The hook is adjustable and multiple hooks can be used per wire.
